# Subject index

- Abelian groups 2  
Absences  
    structural (non-space-group) 167  
    systematic 67, 108, 112, 163, 789  
Absolute configuration 775  
Absolute structure 775  
Abstract point groups 720  
Acentric reflections 125  
Achiral space groups 848  
Additional symmetry elements 55, 91–92, 781–782  
Additional symmetry operations 55, 91–94  
*ADDSYM* 110  
Affine group 849, 851  
Affine mapping 12  
Affine normalizers 65, 826, 830, 847  
    matrix–column representation of 838  
Affine space 22  
Angle of rotation 16  
Anomalous dispersion (scattering), *see* resonant scattering  
Anorthic (triclinic) system 143  
Antiphase domains 136  
Antisymmetry 790  
Aristotype 135  
Arithmetic crystal class 37, 49–50, 152–153  
Asymmetric unit 159  
    for magnetic groups 861  
Atomic heterogeneity, effect on structure-factor statistics 110  
Augmented matrix 16, 84  
*Auslöschungen* (reflection conditions) 163  
Automorphism group 29–30  
Average (*A*) intensities 125  
Axis  
    metric conventions for labelling 172  
    of order infinity 732  
    of rotation 12, 16, 732, 739  
    of rotoinversion 13, 16, 145, 732–733, 738  
    of rotoreflexion 733, 738  
    of screw rotation 12, 164–166  
    polar 739  
Bärnighausen tree 135  
Basic crystal form 723  
Basic point form 723  
Basic structure 135  
Basis 22, 75, 142, 698  
    change of 24, 76–77  
    change of, in a group–subgroup relation 133  
    conventional 25, 43, 698, 700, 712  
    dual 83  
    primitive 25, 44, 700  
    reciprocal 27, 83  
    reduced 172, 698, 709–710  
Basis vectors 42  
Belov–Neronova–Smirnova (BNS) magnetic group type symbols 863  
Biaxial crystals 740  
Bicrystal 137  
Bieberbach groups 62  
Bieberbach theorem 32  
Bilbao Crystallographic Server 132  
Bivariant lattice complex 795  
Black-and-white symmetry 154  
*Blickrichtung* (symmetry direction) 151, 777–778  
Bravais arithmetic crystal class 38  
Bravais class 34  
Bravais–Donnay–Harker principle 740  
Bravais flock 38  
Bravais group 29, 34  
Bravais–Miller indices 165  
Bravais system 142  
Bravais type of lattice 34, 39, 107, 142–144, 152, 700  
    hexagonal 144  
    rhombohedral 144  
Brillouin zone 24  
Burger cell 709, 714  
*c* cell (square lattice) 95  
*C* and *c* cell (tetragonal and hexagonal lattices) 106, 790  
Cell  
    centred 25, 92, 94, 143–144, 161, 164, 699  
    conventional 25, 142, 698, 715  
    deviation of 714  
    multiple 25  
    primitive 25, 143, 160, 164  
    reduced 107, 114, 154, 172, 698, 709, 714  
Cell choice, monoclinic 97, 143, 150, 152, 155, 169–170  
Cell parameters 24, 143, 168  
    restrictions on 143  
Centralizers 10  
Centre 20  
    of a rotoinversion 13  
    of antisymmetry 153–154  
Centred cell 25, 92, 94, 143–144, 161, 164, 699  
    *c* centred 95  
    *S* centring 143, 699  
    symbols for 144, 171  
Centred lattice 24, 44, 164, 699  
Centring vector 25, 44  
Characteristic crystal form 723  
Characteristic orbit 66, 796  
Characteristic point form 723  
Characteristic space-group type 794  
Characteristic type of Wyckoff set 794  
Characteristic Wyckoff position 794, 798–799, 801–802  
Cheshire groups 826  
Chiral crystal structures 111  
Chiral space groups 848  
Chirality 12, 738, 775, 826  
Chirality-preserving Euclidean normalizers 826, 829, 831, 839, 842  
Circle group 851  
Circular point groups 732–733  
Classification of crystal structures 132  
Coaxial equivalents of a reflection or glide reflection 20  
Coaxial symmetry operation 92  
Colour symmetry 152, 790  
Column part of a symmetry operation 13  
Commutative groups 2  
Comparison of crystal structures 132  
Components of a set 714  
Composition of symmetry operations 2  
Composition series 60  
Comprehensive lattice complex 794–795  
Computer programs  
    *ADDSYM* 110  
    *MISSYM* 110  
    *NONCHAR* 798  
    space-group symbols for 42  
    *SPACER* 173  
    *VESTA* 158, 173  
Conditions for conventional cells 715  
Conditions limiting possible reflections 163  
Conjugacy 6  
Conjugacy classes 10–11  
Conjugate subgroups 6, 163, 731, 736, 792, 850  
Conjugation 10  
Conventional basis 25, 43, 698, 700, 712  
Conventional cell 25, 142, 698, 715  
    conditions for 715  
Conventional characters 717  
Conventional coordinate system 41, 142–143  
Convergent-beam electron microdiffraction (CBED) 128  
Convex sets of Niggli images 715  
Coordinate system 13, 23, 142  
    choice of 773  
    conventional 41, 142–143  
    hexagonal 144  
    rhombohedral 144  
    transformation of 75–76, 83  
Coordinates and coordinate triplets 23, 53, 63, 162, 733  
Coplanar equivalents of a reflection or glide reflection 20  
Coplanar symmetry operation 92  
Coset decomposition 29–30, 53–54  
Coset representatives 5, 29, 69, 73  
    for magnetic group types 854  
Cosets 5, 92  
Crystal class 738  
    arithmetic 37, 49–50, 152–153  
    geometric 33, 42, 49, 142, 720  
    names and symbols for 728, 730  
    noncentrosymmetric 739  
    sequence of generators in 59  
Crystal family 40, 142–144, 700, 798, 800  
Crystal form 721, 722–724, 727, 729, 733, 745  
Crystal pattern 2, 12  
Crystal structures, relations between 823  
Crystal system 39, 142–143, 720–721, 740  
Cubic point groups 143, 734, 765  
Cubic space groups 104, 152  
    diagrams for 94, 157–158, 173  
    Hermann–Mauguin symbols for 48  
Cumulative distributions of structure-factor magnitudes 109  
Curie groups 737  
Curie's principle 737  
Cyclic groups 2, 43  
Cylindrical point groups 732, 734  
*D* cell (hexagonal lattice) 77, 88  
Data-collection strategy 108  
Daughter phase 135  
Defining operation 20, 144–145  
Degrees of freedom (for lattice complexes) 795, 799  
Delaunay reduction 701, 707  
Delaunay sorts 715  
Derivative structure 135  
Determinant 16  
Deviation of a cell 714  
Difference (*D*) intensities 125  
Diffraction symbols 114  
Dihedral groups 43  
Dipole moment 741  
Dirichlet domain 24, 698, 701, 703, 823  
Dissymmetry 738  
Distorted structure 135  
Distribution symmetry 799  
Domain interfaces 136  
Domain of influence 698, 701  
Domain structures 136  
Domain twin 138  
Domain walls 137–138  
Dual basis 83  
Dual polyhedra 722, 729  
*e* glide 21, 95–96, 145–147  
Edge form 733, 742  
Edge symmetry 727  
Eigensymmetry (inherent symmetry) 89  
    of a crystal form 723, 727, 739  
    of a point configuration 793, 846  
    of a point form 724  
Eigensymmetry group 66, 113  
Eisenstein–Niggli reduction 701  
Electron density 112  
Element set 20, 44, 55, 144  
Enantiomer 775  
Enantiomeric purity 111  
Enantiomerism 738  
Enantiomorph 775  
    selection of 829  
Enantiomorphic space groups 108, 826  
    subgroups of 134  
Enantiomorphic spheres 740  
Enantiomorphism 33, 734, 738  
Enantioselective synthesis 114  
Enhanced symmetry of Euclidean normalizers 828–829  
Equivalence classes 9  
Equivalent descriptions of crystal structures 838, 848

## SUBJECT INDEX

- Equivalent lists of structure factors 849  
 Equivalent point configurations 838  
 Equivalent subgroups 849  
 Equivalent supergroups 849  
 Equivalent Wyckoff positions 838  
 Etch figures 740  
 Euclidean group 849, 851  
 Euclidean normalizers 66, 826–831, 839, 842  
   chirality-preserving 826, 829, 831, 839, 842  
   with enhanced symmetry 828–829  
 Explicit space-group symbols 42  
 Extended Hermann–Mauguin plane-group symbols 45, 96  
 Extended Hermann–Mauguin space-group symbols 43, 45, 91, 95, 97, 152, 782  
 Extinction symbols 114  
 Extinctions 163, 789  
 Extraordinary orbit 66, 113, 796  
 Extremal principles 714
- F* cell (tetragonal lattice) 100  
 Face form 721, 724, 734, 745, 770  
 Face pole 721, 733  
 Face symmetry 722–724, 727, 740  
 Factor groups 6  
 Family of structures 135  
 Ferroelectricity 741  
 Fixed point 12, 17, 91  
 Fixed-point-free space groups 62  
 Fourier-series expansion of probability density functions 109  
 Fourier synthesis 160  
 Friedel opposites 107, 111, 114, 154  
 Friedel's rule 720, 849  
 Friedel<sub>stat</sub> 125  
 Frieze groups 136  
 Full Hermann–Mauguin space-group symbols 43  
 Fundamental domain 24
- g* glide 106  
 Genera 715  
 General class 732  
 General crystal form 721–722, 724, 745  
 General face form 734  
 General face pole 733  
 General linear group 2  
 General point 722, 733  
 General point form 722, 733–734  
 General point groups 720, 731, 733–735  
   classes of 732  
 General position 10, 15, 62, 162  
   diagrams of 58, 158  
   for magnetic groups 859, 861  
   for point groups 722  
   interpretation in terms of symmetry operations 53, 161  
 General reflection conditions 113, 164  
 General subgroups 133  
 General system 732  
 Generalized symmetry 790  
 Generating point group 723–724  
 Generation of a space group 59–60  
 Generators 4, 59, 161, 777, 779–780  
   for magnetic groups 857, 862  
 Geometric crystal class 33, 42, 49, 142, 720  
 Geometric element 4, 14–15, 20, 42, 55  
 Gitterkomplex (lattice complex) 792  
 Glide part of a symmetry operation 16, 779–781  
 Glide plane 13, 152, 164–165, 171  
   symbols for 779  
 Glide reflections 13, 17, 50  
   effect on reflection conditions 112  
   symbols for 48, 57, 145  
 Glide vector 13, 17, 145–147, 166  
 Graphical symbols 146–149  
 Grenzform (limiting form) 723  
 Group actions 9  
 Group-subgroup relations 132, 135, 823  
   at a phase transition 135  
   change of basis in 133  
   diamond–zinc blende 135  
   origin shift in 133  
   ReO<sub>3</sub>–WO<sub>3</sub> 135  
 Groups 2
- Grundform (basic form) 723
- H* and *h* cell (hexagonal lattice) 77, 95, 106, 144, 164, 168, 790  
 Hall symbols 42  
 Handedness 12  
 Harker sections 109  
 Hauptgitter (Weissenberg complex) 796  
 Hemihedry 720  
 Hermann, theorem of 133  
 Hermann–Mauguin plane-group symbols 48, 151  
   changes of 152  
   extended 96  
 Hermann–Mauguin point-group symbols 721, 724, 732–734, 777–778  
   see also international point-group symbols  
 Hermann–Mauguin space-group symbols 43, 49, 91, 95, 97, 151, 779, 783  
   changes of 145, 152, 790  
   extended 43, 45, 91, 95, 97, 152, 782  
   full 43  
   short 43, 45  
   see also international space-group symbols  
 Hettotype 135  
 Hexagonal axes, cell and coordinate system 77, 143–144, 721  
 Hexagonal Bravais lattice 144  
 Hexagonal crystal family 142–144  
   distribution of space-group types in 40  
 Hexagonal crystal system 49, 143  
 Hexagonal plane groups 96  
 Hexagonal point groups 143, 744, 760  
 Hexagonal space groups 103  
   diagrams for 157  
   Hermann–Mauguin symbols for 48  
 Holohedral point group 143, 698, 720–721, 731  
 Holohedry 37, 39, 110, 698, 720–721, 731  
 Homeotypic structures 135  
 Homomorphism 7, 28  
   image of 8  
   injective 8  
   kernel of 8, 28  
   surjective 8  
 Homomorphism theorem 9
- Icosahedral point groups 733, 770  
 Ideal crystal 12  
 Identity operation 12  
 Image of a homomorphism 8  
 Image point 12  
 Improper isometry 12  
 Index  
   of a subgroup 5, 133, 830, 850  
   of a sublattice 718  
   of a supergroup 731  
 Indicators 46, 779–780  
 Inherent symmetry, see eigensymmetry  
 Injective homomorphism 8  
 Integral reflection conditions 164  
 International point-group symbols 728  
   see also Hermann–Mauguin point-group symbols  
 International space-group symbols 151, 778, 780  
   see also Hermann–Mauguin space-group symbols  
 International symbols for symmetry elements 777  
 Intersection parameter 780  
 Intrinsic translation part of a symmetry operation 16–17, 55, 91  
 Invariant lattice complex 795, 798  
 Inversion 13, 50  
 Inversion centre 13, 57, 145, 148  
 Isometry 12  
 Isometry group  
   of the circle 851  
   of the sphere 851  
 Isomorphic groups 8  
 Isomorphic subgroups 134, 136  
   maximal 134  
 Isomorphism 7–8  
 Isomorphism classes of point groups 720  
 Isotropic crystals 740  
 Isotropy subgroup 112  
 Isotypic structures 135
- Jones' faithful representation symbol 51
- Kernel of a homomorphism 8, 28  
 Klassengleiche (*k*-) subgroups 133–135, 782  
 Konfigurationslage (Wyckoff set) 792  
 Kugelgruppe (sphere group) 734
- Lagesymmetrie (site symmetry) 163  
 Lagrange's theorem 5  
 Lattice 22, 698  
   Bravais types of 34, 39, 107, 142–144, 152, 700  
   centred 24, 44, 164, 699  
   classifications of 700  
   primitive 24, 44, 699  
   reciprocal 27, 729  
   rhombohedral 26  
   topological properties of 698  
 Lattice basis 22, 698, 700  
 Lattice characters 712–714  
 Lattice-complex symbols 798–800, 823–824  
   central part 799  
 Lattice complexes 792–793  
   applications of 800  
   bivariant 795  
   comprehensive 794–795  
   degrees of freedom 795, 799  
   invariant 795, 798  
   limiting 792, 794–795, 823  
   of plane groups 801  
   shift vector in 799  
   trivariant 795  
   univariant 795  
 Lattice parameters 143, 699  
 Lattice point group 37, 698, 720  
 Lattice point symmetry 143, 720, 730  
 Lattice symmetry directions 777–778  
 Lattice system 39, 142  
 Laue class 108, 114, 125, 152, 720–721, 738  
 Laue group 107, 143  
 Layer groups 68, 136–137, 774  
   as subgroups of space groups 137  
   sectional 137  
 Left coset 5  
 Limiting crystal form 722–724, 726, 730  
   realization of 726, 730  
 Limiting lattice complex 792, 794–795, 823  
 Limiting point form 722–723, 742  
 Line groups 143, 172  
   symmetry elements and operations of 145  
 Linear orbit 137  
 Linear part of a space-group operation 22  
 Linear part of a symmetry operation 13  
 Liquid crystals 136  
 Location of a subgroup 856  
 Location of a symmetry operation 93–94  
 Location part of a symmetry operation 17, 55, 91, 779–780
- Macromolecular crystallography, space-group determination in 126  
 Macroscopic crystal 12  
 Magnetic group type  
   Belov–Neronova–Smirnova (BNS) symbols for 863  
   coset representatives for 854  
   Hermann–Mauguin-type symbols for 853  
   numbering of 853  
   Opechowski–Guccione (OG) symbols for 854, 863  
 Magnetic groups 852–854  
   asymmetric unit for 861  
   generators for 857, 862  
   klassengleiche (*k*-) subgroups of 852  
   maximal subgroups 863  
   properties of 857  
   translationengleiche (*t*-) subgroups of 852  
 Magnetic space groups 852  
   lattice diagrams for 857  
 Magnetic subperiodic groups 852  
 Magnetic superfamily 852  
 Mapping  
   affine 12  
   reversible 12  
 Mapping of mappings 84

## SUBJECT INDEX

- Matrices  
   augmented 16, 84  
   for point-group symmetry operations 14–15, 729, 735  
   for unit-cell (basis) transformations 77  
 Matrix–column pair 13, 22  
 Matrix of metric coefficients 698, 701  
   *see also* metric tensor  
 Matrix part of a symmetry operation 13  
 Matrix representation of a symmetry operation 160, 162, 721, 729, 735, 779  
 Maximal subgroups 4, 133  
   chains of 132  
   isomorphic 134  
   non-isomorphic 134  
   of point groups 731, 736  
 Merohedry 720  
 Metric conventions for labelling of axes 172  
 Metric parameters for basis vectors 698  
 Metric tensor 23, 84, 107, 698, 700–701  
 Miller indices  
   for crystal forms 728, 733  
   for point groups 721, 742, 745  
   transformation of 83, 85, 849  
 Minimal supergroups 134, 731  
 Mirror plane 13, 145  
 Mirror point 172  
 Misordered (disordered) structure 135  
 Missing spectra 163  
*MISSYM* 110  
 Molecular symmetry 772  
 Monoclinic axis 46  
 Monoclinic crystal system 143  
 Monoclinic point groups 143, 745  
 Monoclinic settings and cell choices 95, 97, 150, 155, 169–172  
   transformations between 77, 87–88  
 Monoclinic space groups 150–151, 169  
   diagrams for 155  
   symbols for 46, 97, 151–152, 781  
 Morphology 739  
 Motion 12  
 Multi-domain crystals 111  
 Multiple cell 25  
 Multiplication table 2  
 Multiplicity 55, 63, 162, 772  
   of a crystal form 722, 727  
   of a point form 727, 733  
  
*n*-fold rotation 12  
*N*(*z*) test for centrosymmetry 109  
 Nanocrystals, space-group determination 128  
 Negative sense of rotation 12  
 Neumann's principle 739  
 Niggli cell 714  
 Niggli images 714  
   convex sets of 715  
 Niggli point 714  
 Noncentrosymmetric crystal classes 739  
*NONCHAR* 798  
 Noncharacteristic crystal form 723  
 Noncharacteristic orbit 59, 66, 167, 796  
 Noncharacteristic point form 723  
 Noncrystallographic point groups 720, 731, 851  
 Noncrystallographic symmetry 731, 733–734, 851  
 Non-isomorphic subgroups, maximal 134  
 Non-symmorphic space groups 31  
 Normal subgroups 6, 731  
 Normalizers 10–11, 826  
   affine 65, 826, 830, 847  
   Euclidean 66, 826–831, 839, 842  
   of plane groups 827, 829–830  
   of point groups 723, 851  
   of space groups 827, 830–831, 839, 842, 847  
  
 Oblique crystal system 48  
 Oblique plane groups 96  
 Oblique point groups 742  
 Obverse setting of *R* cell 77, 88, 144, 150, 157, 164  
 Ogdohedry 720, 731  
 One-dimensional groups, *see* line groups  
 Opechowski–Guccione (OG) magnetic group type  
   symbols 854, 863  
 Optical activity 740  
 Optical indicatrix 740  
 Optical isomers 738  
 Optical properties 740  
 Orbit 9, 61, 792, 838  
   characteristic 66, 796  
   extraordinary 66, 113, 796  
   linear 137  
   non-characteristic 59, 66, 167, 796  
   point group 772  
 Orbit type 796  
 Order of a group 2  
 Order of a point group 720, 722, 731–735  
 Order of an isometry 12  
 Oriented face-symmetry symbol 724  
 Oriented site-symmetry symbol 63, 163, 724, 727, 770  
 Origin 142, 158–159  
   fixing of 849  
   for magnetic groups 861  
 Origin choice 31, 87, 90  
 Origin shift 75, 780, 829  
   in a group–subgroup relation 133  
 Orthohexagonal *C* cell 77, 106, 790  
 Orthorhombic crystal system 143  
 Orthorhombic point groups 143, 747  
 Orthorhombic space groups  
   diagrams for 155  
   Hermann–Mauguin symbols for 46, 98  
   settings 46, 77, 96, 155  
  
 Parent structure 135  
 Parity classes of structure factors 849  
 Patterson function 108, 152–153  
 Patterson symmetry 152–153  
 Penetration line 68  
 Phase transitions 86, 132, 138  
   basic (parent) structure 86  
   comparison of lattice complexes in 823  
   derivative structure 86  
   group–subgroup relations at 135  
 Physical properties of crystals 111, 737  
 Piezoelectricity 741  
 Plane groups 71  
   diagrams for 154  
   lattice complexes of 801  
   normalizers of 827, 829–830  
   reflection conditions 164, 166  
   symbols, changes of 152  
   symbols for 45, 48, 95–96, 143, 151–152  
   symmetry directions 151  
   symmetry elements and operations of 145, 148  
 Point configurations 793, 798, 838  
   eigensymmetry of 793, 846  
   equivalent 838  
   geometrical properties of 800  
 Point form 722–724, 727, 729, 733–734, 742, 745  
   for icosahedral point groups 770  
   limiting 722–723, 742  
 Point-group symmetry 107, 145, 148  
   matrices for 14–15, 729, 735  
 Point-group types 39, 42, 772  
 Point groups 22, 28, 107, 143, 720  
   abstract 720  
   circular 732–733  
   cubic 143, 734, 765  
   cylindrical 732, 734  
   definition of 720  
   determination from physical properties 737  
   diagrams and tables of 721, 742, 745, 770  
   general 720, 731, 733–735  
   generating point group 723–724  
   Hermann–Mauguin symbols for 721, 724, 732–734, 777–778  
   holohedral 143, 698, 720–721, 731  
   icosahedral 733, 770  
   isomorphism classes of 720  
   lattice point groups 720  
   noncentrosymmetric 738  
   noncrystallographic 720, 731, 851  
   normalizers of 723, 851  
   of a molecule 772  
   one-dimensional 143, 172  
   order of 720, 722, 731–735  
   polar 739  
   Schoenflies symbols for 721, 728, 732, 734, 777  
  
 Point groups  
   spherical 732, 734–735  
   stereographic projections of 721, 742, 745, 770  
   subgroups of 731, 735  
   supergroups of 731, 735  
 Point symmetry 163  
   of a lattice 143, 720, 730  
 Polar axis 739  
 Polar direction 739, 741  
 Polar point groups 739  
 Positive sense of rotation 12  
 Possible space groups 108  
 Powder diffraction, space-group determination in 127  
 Preimage 12  
 Primitive basis 25, 44, 700  
 Primitive cell 25, 143, 160, 164  
 Primitive lattice 24, 44, 699  
 Priority rule 44  
 Probability density functions (p.d.f.'s) 109  
 Projection  
   of a centred cell or lattice 167  
   of a symmetry element 169  
 Projection–slice theorem 68  
 Projection symmetry 167  
   of a point group 742, 745, 770  
 Projections 49, 67, 71  
   stereographic, of point groups 721, 742, 745, 770  
 Proper isometry 12  
 Proper subgroups 4  
 Prototype 135  
*Punktlage* (position) 162  
*Punktsymmetrie* (site symmetry) 163  
 Pyroelectricity 741  
  
 Quotient groups 6  
  
*R* cell (rhombohedral lattice) 77, 88, 144, 150, 157  
*R*<sub>int</sub> 126  
*R*<sub>merge</sub> 108, 126  
 Racemate 111  
 Rational linear section 68  
 Rational planar section 68  
 Rational section 67  
 Real crystal 12  
 Realization of a limiting crystal form 726, 730  
 Reciprocal basis 27, 83  
 Reciprocal lattice 27, 729  
 Rectangular crystal system 48  
 Rectangular plane groups 96  
 Rectangular point groups 743  
 Reduced basis 172, 698, 709  
   special conditions 710  
 Reduced cell 107, 114, 154, 172, 698, 709, 714  
   main conditions 709  
   special conditions 709  
   type of 709  
 Reduced form 709  
 Reduced magnetic superfamily 852  
 Reduced symmetry operation 12, 17, 91  
 Reflection (mirror reflection) 13, 17, 50, 145–148  
 Reflection conditions 112, 163, 789, 823  
   effect of glide reflections 112  
   effect of screw rotations 113  
   for plane groups 164, 166  
   general 113, 164  
   integral 164  
   serial 164–165  
   special 67, 113, 164, 166  
   transformation of 89  
   zonal 165  
 Reflection plane 13  
 Reflection point 172  
 Reflections  
   acentric 125  
   symmetry-related 112  
   systematically absent 67, 108, 112, 163, 789  
 Refraction 740  
 Representative group 853  
 Representative symmetry directions 44–45, 48  
 Resonant scattering 107, 114, 152–153, 849  
 Reverse setting of *R* cell 77, 88, 144, 150, 164  
 Reversible mapping 12  
 Rhombohedral axes, cell and coordinate system 77, 88, 143–144, 164, 721

## SUBJECT INDEX

- Rhombohedral Bravais lattice 142, 144  
 Rhombohedral lattice 26  
 Rhombohedral space groups 87, 142, 144, 150  
   diagrams for 157  
   Hermann–Mauguin symbols for 48, 102  
   reflection conditions for 164  
 Right coset 5  
 Rigid motion 12  
 Rod groups 68, 136, 774  
 Rotation 12, 16–17, 50  
 Rotation angle 16  
 Rotation axis 12, 16, 732, 739  
 Rotation part of a symmetry operation 779  
 Rotoinversion 13, 16, 50, 145  
 Rotoinversion axis 13, 16, 145, 732–733, 738  
 Rotoreflexion axis 733, 738
- S* centring 143, 699  
 Scanning direction 137  
 Scanning group 71  
 Scanning tables 137  
 Schoenflies point-group symbols 721, 728, 732, 734, 777  
 Schoenflies space-group symbols 42, 49, 97, 779, 783  
 Screw axis 12, 164–166  
 Screw part of a symmetry operation 16, 779–781  
 Screw rotations 12–13, 17, 50, 57, 94, 145, 779  
   effect on reflection conditions 113  
 Screw vector 12–13, 17, 145, 148–149, 166  
 Second-harmonic generation 741  
 Section plane 68  
 Sectional layer groups 137  
 Sections 49, 67–68  
   rational 67  
   rational linear 68  
   rational planar 68  
 Seitz symbols 13, 51–53  
 Selling–Delaunay reduction 701  
 Serial reflection conditions 164–165  
 Settings 87, 91  
   monoclinic 77, 97, 155, 170, 790  
   orthorhombic 77, 98, 155  
   rhombohedral, obverse and reverse 77, 144, 150, 164  
 Shift vector 83  
   in lattice complexes 799  
 Short Hermann–Mauguin space-group symbols 43, 45  
   conventional 45  
 Shubnikov point-group symbols 777–778  
 Shubnikov space-group symbols 779, 783  
 Shubnikov symbols for symmetry elements 777  
 Side-preserving operation 69  
 Side-reversing operation 69  
 Simplest symmetry-operation rule 44, 46  
 Site-set symbol 799  
 Site symmetry 63  
   of point groups 722–724, 727, 733  
   symbols for 63, 163, 724, 727, 770  
 Site-symmetry group 10, 31, 61–62, 792  
 Sohncke space-group types 826  
 Sohncke space groups 111, 775, 848  
 Space-group determination 107, 163  
   by electron microscopy 128  
   for nanocrystals 128  
   in macromolecular crystallography 126  
   in powder diffraction 127  
 Space-group numbers 42  
 Space-group operation 22  
 Space-group symbols  
   changes of 145, 152, 790  
   explicit 42  
   for use in computer programs 42  
   international symbols 151, 778, 780  
   Hermann–Mauguin symbols 43, 49, 91, 95, 97, 151, 779, 783  
   Schoenflies symbols 42, 49, 97, 779, 783  
   Shubnikov symbols 779, 783  
 Space-group tables, computer production of 172  
 Space-group types 31  
   characteristic 794  
   sequence of 49  
   Sohncke space-group types 826
- Space groups 22, 42  
   achiral 848  
   chiral 848  
   classification of 31, 142  
   diagrams for 56, 154  
   enantiomorphic 108, 826  
   enantiomorphic, subgroups of 134  
   fixed-point-free 62  
   generation of 59–60  
   incorrect assignment of 167, 824  
   lattice complexes of 802  
   magnetic 852  
   non-symmorphic 31  
   normalizers of 827, 830–831, 839, 842, 847  
   one-dimensional (line groups) 143, 172  
   possible 108  
   Sohncke space groups 111, 775, 848  
   symmetry elements and operations of 145  
   symmorphic 31, 152–153  
   transformations between different descriptions of 87  
*SPACER* 173  
 Special crystal form 722, 724, 729  
 Special point 722  
 Special point form 722  
 Special position 10, 62, 162, 722  
 Special-position absences 114  
 Special projections 167  
 Special reflection conditions 67, 113, 164, 166  
 Specialized metrics 36, 827, 829  
 Sphere group 734, 851  
 Sphere packings 800  
 Spherical-atom approximation 113  
 Spherical point groups 732, 734–735  
 Square crystal system 49  
 Square plane groups 96  
 Square point groups 743  
 Stabilizers 9, 112  
 Stereographic projections of point groups 721, 742, 745, 770  
 Structural (non-space-group) absences 167  
 Structure factors  
   cumulative distributions of 109  
   effect of space-group symmetry on 112  
   equivalent lists of 849  
   histograms of 109  
   normalized 109  
   parity classes of 849  
   probability density functions (p.d.f.'s) of 109  
   statistics for 109  
 Structure validation 110  
 Subgroups 4, 132, 134  
   affine equivalent 849  
   conjugate 6, 163, 731, 736, 792, 850  
   diagrams of 4  
   Euclidean equivalent 849  
   general 133  
   index of 5, 133, 830, 850  
   isomorphic 134, 136  
   isotropy subgroup 112  
   *klassengleiche* (*k*-) 133–135, 782  
   location of 856  
   maximal 4, 133, 731, 736  
   maximal, chains of 132  
   maximal isomorphic 134  
   maximal non-isomorphic 134  
   normal 6, 731  
   of enantiomorphic space groups 134  
   of magnetic groups 852, 863  
   of point groups 731, 735  
   proper 4  
   translation subgroup 22, 29, 54, 69, 73, 92, 700  
   *translationengleiche* (*t*-) 133, 135, 731  
   trivial 4  
 Sublattices  
   index of 718  
   number of 718  
 Subperiodic groups 68, 136, 852  
 Supergroups 4, 132, 134  
   affine equivalent 849  
   Euclidean equivalent 849  
   index of 731  
   minimal 134, 731
- Supergroups  
   of point groups 731, 735  
   *translationengleiche* (*t*-) 731  
 Surjective homomorphism 8  
 Symbols  
   Belov–Neronova–Smirnova (BNS), for magnetic group types 863  
   diffraction symbols 114  
   explicit space-group symbols 42  
   for Bravais types of lattice 142–143  
   for centring types 144, 171  
   for crystal classes 143, 728, 730  
   for crystal families 142–143  
   for glide planes 779  
   for glide reflections 48, 57, 145  
   for lattice complexes 798–800, 823–824  
   for line groups 143, 172  
   for magnetic group types 853  
   for plane groups 45, 48, 95–96, 143, 151–152  
   for plane groups, changes of 152  
   for site symmetries 63, 163, 724, 727, 770  
   for space groups, changes of 152, 790  
   for symmetry elements and operations 50–51, 144–149, 777, 779  
   Hall symbols 42  
   Hermann–Mauguin plane-group symbols 48, 152  
   Hermann–Mauguin point-group symbols 721, 724, 732–734, 777–778  
   Hermann–Mauguin space-group symbols 43, 49, 91, 95, 97, 151, 779, 783  
   international, for symmetry elements 777  
   international point-group symbols 728  
   international space-group symbols 151, 778, 780  
   Jones' faithful representation symbol 51  
   Opechowski–Guccione (OG), for magnetic group types 854, 863  
   Schoenflies point-group symbols 721, 728, 732, 734, 777  
   Schoenflies space-group symbols 42, 49, 97, 779, 783  
   Seitz symbols 13, 51–53  
   Shubnikov, for symmetry elements 777  
   Shubnikov point-group symbols 777  
   Shubnikov space-group symbols 779  
   site-set symbol 799  
*Symétrie ponctuelle* (site symmetry) 163  
*Symmetrische Sorten* 700, 703, 715  
 Symmetry  
   black-and-white 154  
   colour 152, 790  
   generalized 790  
   inherent (eigensymmetry) 723–724, 727, 739  
   molecular 772  
   noncrystallographic 731, 733–734, 851  
   of a crystal face 722–723  
   of diffraction record 720  
   of physical properties 737  
   of special projections 167, 722, 862  
   Patterson symmetry 152–153  
 Symmetry axes 148  
 Symmetry centre 721  
 Symmetry directions 44, 151, 777–778, 790  
   representative 44–45, 48  
 Symmetry elements 4, 19–20, 144  
   additional 55, 91–92, 781–782  
   diagrams of 57, 154, 721  
   for magnetic groups 859  
   projection of 169  
   symbols for 144–149, 777, 779  
 Symmetry enhancement of Euclidean normalizers 828–829  
 Symmetry operations 2, 12, 160–161  
   additional 55, 91–94  
   coaxial 92  
   column part of 13  
   composition of 2  
   coplanar 92  
   defining symmetry operation 145  
   for magnetic groups 861  
   glide part 16, 779–781  
   intrinsic translation part 16–17, 55, 91  
   linear part of 13  
   location of 93–94  
   location part 17, 55, 91, 779–780

## SUBJECT INDEX

- Symmetry operations
  - matrix part of 13
  - matrix representation of 160, 162, 721, 729, 735, 779
  - reduced 12, 17, 91
  - relationship to general position 53
  - rotation part 779
  - screw part 16, 779–781
  - simplest symmetry-operation rule 44, 46
  - symbols for 50–51, 145, 777
  - transformation of 84, 89
  - translation part 13, 779–780
  - type of 16, 55, 91
- Symmetry reduction 850
- Symmetry-related reflections 112
- Symmorphic space groups 31, 152–153
- Systematic absences 67, 108, 112, 163, 789
  
- Tensor properties 741
- Tetartohedry 720, 731
- Tetragonal crystal system 143
- Tetragonal point groups 143, 749
- Tetragonal space groups
  - diagrams for 157
  - Hermann–Mauguin symbols for 47, 100
- Thin films 136
- Topological characterization of lattice characters 714
- Topological properties of lattices 698
- Topotactic reaction 132, 136
- Trace of a matrix 16
- Transformation of coordinate system 24, 75–77
  - contravariant quantities 83
  - covariant quantities 83
  - general 83
  - linear part 76
- Transformation of Miller indices 83, 85, 849
- Transformation of reflection conditions 89
- Transformation of symmetry operations 84, 89
- Transformations between different space-group descriptions 87
- Translation 12, 50
- Translation part of a space-group operation 22
- Translation part of a symmetry operation 13, 779–780
  - intrinsic 16–17
- Translation subgroup 22, 29, 54, 69, 73, 92, 700
- Translationengleiche* (*t*-) subgroups 133, 135
- Tree of group–subgroup relations 135
- Triclinic crystal system 143
- Triclinic point groups 745
- Triclinic space groups
  - diagrams for 154
  - Hermann–Mauguin symbols for 45, 97
- Trigonal crystal system 142–143
- Trigonal point groups 143, 752
- Trigonal space groups
  - diagrams for 157
  - Hermann–Mauguin symbols for 47, 102
- Trivariant lattice complex 795
- Trivial subgroup 4
- Truncation of a polyhedron 730
- Twin boundary 137
- Twinning 111, 136
  - by merohedry 740
- Two-dimensional space groups, *see* plane groups
- Type of reduced cell 709
- Type of symmetry operation 16, 55, 91
  
- Uniaxial crystals 740
- Unique monoclinic axis 46, 87–88, 97, 150, 155, 170
  
- Unit cell 24, 698
  - centred 25
  - conventional 25
  - primitive 25
- Unit (or identity) element 2
- Univariant lattice complex 795
  
- Vector space 22
- VESTA* 158, 173
- Voronoi domain 24, 698, 710
- Voronoi type 700
  
- Wallpaper groups 48, 71
- Weissenberg complexes 795–796, 800
- Wigner–Seitz cell 24, 698
- Wirkungsbereich* (domain of influence) 24, 698
- Wyckoff letter 63, 162, 722, 727, 733
- Wyckoff positions 10, 62, 162, 795
  - affine equivalent 846
  - assignment to lattice complexes 798, 800–802
  - characteristic 794, 798–799, 801–802
  - equivalent 838
  - Euclidean equivalent 846
  - for magnetic groups 862
  - limiting form of 723
  - of a crystal or point form 722, 727
  - relations between 132, 136
  - splitting of 135
- Wyckoff set 64–66, 792, 800–802, 846
  - characteristic type of 794
  
- Zonal reflection conditions 165
