## CONTENTS

<b>1.4.2. Descriptions of space-group symmetry operations</b> (MOIS I. AROYO, GERVAIS CHAPUIS, BERND SOUVIGNIER AND A. M. GLAZER) .....	36
<b>1.4.2.1. Symbols for symmetry operations</b> .....	36
<b>1.4.2.2. Seitz symbols of symmetry operations</b> .....	37
<b>1.4.2.3. Symmetry operations and the general position</b> .....	39
<b>1.4.2.4. Additional symmetry operations and symmetry elements</b> .....	40
<b>1.4.2.5. Space-group diagrams</b> .....	42
<b>1.4.3. Generation of space groups</b> (HANS WONDRTSCHEK) .....	44
<b>1.4.3.1. Selected order for non-translational generators</b> .....	45
<b>1.4.4. General and special Wyckoff positions</b> (BERND SOUVIGNIER) .....	46
<b>1.4.4.1. Crystallographic orbits</b> .....	46
<b>1.4.4.2. Wyckoff positions</b> .....	47
<b>1.4.5. Sections and projections of space groups</b> (BERND SOUVIGNIER) .....	50
<b>1.4.5.1. Introduction</b> .....	50
<b>1.4.5.2. Sections</b> .....	50
<b>1.4.5.3. Projections</b> .....	53
<b>1.5. Transformations of coordinate systems</b> (HANS WONDRTSCHEK, MOIS I. AROYO, BERND SOUVIGNIER AND GERVAIS CHAPUIS) .....	57
<b>1.5.1. Origin shift and change of the basis</b> (HANS WONDRTSCHEK AND MOIS I. AROYO) .....	57
<b>1.5.1.1. Origin shift</b> .....	57
<b>1.5.1.2. Change of the basis</b> .....	58
<b>1.5.1.3. General change of coordinate system</b> .....	63
<b>1.5.2. Transformations of crystallographic quantities under coordinate transformations</b> (HANS WONDRTSCHEK AND MOIS I. AROYO) .....	63
<b>1.5.2.1. Covariant and contravariant quantities</b> .....	63
<b>1.5.2.2. Metric tensors of direct and reciprocal lattices</b> .....	64
<b>1.5.2.3. Transformation of matrix–column pairs of symmetry operations</b> .....	64
<b>1.5.2.4. Example: paraelectric-to-ferroelectric phase transition of GeTe</b> .....	64
<b>1.5.3. Transformations between different space-group descriptions</b> (GERVAIS CHAPUIS, HANS WONDRTSCHEK AND MOIS I. AROYO) .....	66
<b>1.5.3.1. Space groups with more than one description in IT A</b> .....	66
<b>1.5.3.2. Examples</b> .....	67
<b>1.5.4. Synoptic tables of plane and space groups</b> (BERND SOUVIGNIER, GERVAIS CHAPUIS AND HANS WONDRTSCHEK) .....	69
<b>1.6. Introduction to the theory and practice of space-group determination</b> (URI SHMUELI, HOWARD D. FLACK AND JOHN C. H. SPENCE) .....	75
<b>1.6.1. Overview</b> .....	75
<b>1.6.2. Symmetry determination from single-crystal studies</b> (URI SHMUELI AND HOWARD D. FLACK) .....	75
<b>1.6.2.1. Symmetry information from the diffraction pattern</b> .....	75
<b>1.6.2.2. Structure-factor statistics and crystal symmetry</b> .....	76
<b>1.6.2.3. Symmetry information from the structure solution</b> .....	78
<b>1.6.2.4. Restrictions on space groups</b> .....	78
<b>1.6.2.5. Pitfalls in space-group determination</b> .....	79
<b>1.6.3. Theoretical background of reflection conditions</b> (URI SHMUELI) .....	79
<b>1.6.3.1. Example: a determination of reflection conditions</b> .....	80
<b>1.6.4. Reflection conditions and possible space groups</b> (HOWARD D. FLACK AND URI SHMUELI) .....	81
<b>1.6.4.1. Introduction</b> .....	81
<b>1.6.4.2. Examples</b> .....	82
<b>1.6.5. Space-group determination in macromolecular crystallography</b> (HOWARD D. FLACK) .....	83
<b>1.6.6. Space groups for nanocrystals by electron microscopy</b> (JOHN C. H. SPENCE) .....	83
<b>1.6.7. Examples</b> (HOWARD D. FLACK) .....	84
<b>1.6.7.1. Example (1), 4-chlorophenol, <math>C_6H_5OCl</math></b> .....	84

## CONTENTS

<b>1.6.7.2. Example (2), [BDTA]<sub>2</sub>[CuCl<sub>4</sub>] .....</b>	85
<b>1.6.7.3. Example (3), flo19, C<sub>62</sub>H<sub>46</sub>N<sub>14</sub> .....</b>	86
<b>1.6.7.4. Example (4), CSD refcode FOYTAO01, C<sub>12</sub>H<sub>20</sub>O<sub>6</sub> .....</b>	86
<b>1.7. Applications of crystallographic symmetry: space-group symmetry relations, subperiodic groups and magnetic symmetry</b> (HANS WONDRTSCHEK, ULRICH MÜLLER, DANIEL B. LITVIN, VOJTECH KOPSKÝ AND CAROLYN PRATT BROCK) .....	89
<b>1.7.1. Subgroups and supergroups of space groups</b> (HANS WONDRTSCHEK) .....	89
<b>1.7.1.1. Translationengleiche (or <i>t</i>-) subgroups of space groups</b> .....	90
<b>1.7.1.2. Klassengleiche (or <i>k</i>-) subgroups of space groups</b> .....	91
<b>1.7.1.3. Isomorphic subgroups of space groups</b> .....	91
<b>1.7.1.4. Supergroups</b> .....	91
<b>1.7.2. Relations between Wyckoff positions for group–subgroup-related space groups</b> (ULRICH MÜLLER) .....	92
<b>1.7.2.1. Symmetry relations between crystal structures</b> .....	92
<b>1.7.2.2. Substitution derivatives</b> .....	92
<b>1.7.2.3. Phase transitions</b> .....	92
<b>1.7.2.4. Domain structures</b> .....	93
<b>1.7.2.5. Presentation of the relations between the Wyckoff positions among group–subgroup-related space groups</b> .....	93
<b>1.7.3. Subperiodic groups</b> .....	94
<b>1.7.3.1. Relationships between space groups and subperiodic groups</b> (DANIEL B. LITVIN AND VOJTECH KOPSKÝ) .....	94
<b>1.7.3.2. Use of subperiodic groups to describe structural units</b> (CAROLYN PRATT BROCK) .....	96
<b>1.7.3.3. Applications of rod groups</b> (ULRICH MÜLLER) .....	98
<b>1.7.4. Magnetic subperiodic groups and magnetic space groups</b> (DANIEL B. LITVIN) .....	100
<b>1.7.4.1. Introduction</b> .....	100
<b>1.7.4.2. Survey of magnetic subperiodic groups and magnetic space groups</b> .....	101
<b>PART 2. CRYSTALLOGRAPHIC SYMMETRY DATA</b> .....	107
<b>2.1. Guide to and examples of the space-group tables in IT A</b> (THEO HAHN, AAFJE LOOIJENGA-VOS, MOIS I. AROYO, HOWARD D. FLACK AND KOICHI MOMMA) .....	108
<b>2.1.1. Conventional descriptions of plane and space groups</b> (THEO HAHN AND AAFJE LOOIJENGA-VOS) .....	108
<b>2.1.1.1. Classification of space groups</b> .....	108
<b>2.1.1.2. Conventional coordinate systems and cells</b> .....	108
<b>2.1.2. Symbols of symmetry elements</b> (THEO HAHN AND MOIS I. AROYO) .....	110
<b>2.1.3. Contents and arrangement of the tables</b> (THEO HAHN, AAFJE LOOIJENGA-VOS, MOIS I. AROYO, HOWARD D. FLACK AND KOICHI MOMMA) .....	116
<b>2.1.3.1. General layout</b> .....	116
<b>2.1.3.2. Space groups with more than one description</b> .....	116
<b>2.1.3.3. Headline</b> .....	117
<b>2.1.3.4. International (Hermann–Mauguin) symbols for plane groups and space groups</b> .....	117
<b>2.1.3.5. Patterson symmetry</b> .....	118
<b>2.1.3.6. Space-group diagrams</b> .....	119
<b>2.1.3.7. Origin</b> .....	123
<b>2.1.3.8. Asymmetric unit</b> .....	123
<b>2.1.3.9. Symmetry operations</b> .....	124
<b>2.1.3.10. Generators</b> .....	125
<b>2.1.3.11. Positions</b> .....	126
<b>2.1.3.12. Oriented site-symmetry symbols</b> .....	126
<b>2.1.3.13. Reflection conditions</b> .....	127
<b>2.1.3.14. Symmetry of special projections</b> .....	130
<b>2.1.3.15. Crystallographic groups in one dimension</b> .....	131

## CONTENTS

<b>2.1.4. Examples of plane- and space-group tables</b>	131
<b>2.2. The symmetry-relations tables of IT A1 (HANS WONDRTSCHEK, MOIS I. AROYO AND ULRICH MÜLLER)</b>	212
<b>2.2.1. Guide to the subgroup tables (HANS WONDRTSCHEK AND MOIS I. AROYO)</b>	212
<b>2.2.1.1. Contents and arrangement of the subgroup tables</b>	212
<b>2.2.1.2. I Maximal <i>translationengleiche</i> subgroups (<i>t</i>-subgroups)</b>	212
<b>2.2.1.3. II Maximal <i>klassengleiche</i> subgroups (<i>k</i>-subgroups)</b>	213
<b>2.2.1.4. Minimal supergroups</b>	214
<b>2.2.2. Examples of the subgroup tables</b>	214
<b>2.2.3. Guide to the tables of relations between Wyckoff positions (ULRICH MÜLLER)</b>	217
<b>2.2.3.1. Guide to the use of the tables</b>	217
<b>2.2.3.2. Cell transformations</b>	219
<b>2.2.3.3. Origin shifts</b>	219
<b>2.2.3.4. Nonconventional settings of orthorhombic space groups</b>	219
<b>2.2.4. Examples of the tables of relations between Wyckoff positions</b>	220
<b>2.3. The subperiodic group tables of IT E (DANIEL B. LITVIN)</b>	224
<b>2.3.1. Guide to the subperiodic group tables</b>	224
<b>2.3.1.1. Content and arrangement of the tables</b>	224
<b>2.3.1.2. Diagrams for the symmetry elements and the general position</b>	225
<b>2.3.1.3. Symmetry operations</b>	225
<b>2.3.1.4. Subgroups and supergroups</b>	225
<b>2.3.2. Examples of subperiodic group tables</b>	225
<b>2.4. The Symmetry Database (ELI KROUMOVA, GEMMA DE LA FLOR AND MOIS I. AROYO)</b>	232
<b>2.4.1. Space-group symmetry data</b>	232
<b>2.4.2. Symmetry relations between space groups</b>	233
<b>2.4.3. 3D Crystallographic point groups</b>	233
<b>2.4.4. Availability</b>	233
<b>Subject index</b>	234
